PG DISSERTATION:

LINGUISTIC PROFILE TEST FOR MALAYALAM FOR PRIMARY CLASS CHILDREN.

This work designs a Linguistic Profile Test in Malayalam, which could help analysis weather a child is facing any language disabilities and if so to pin point the trouble facing area. The population chosen for the study was primary class students, as the earlier the trouble identified the faster the child can receive the required help and support.

Ph.D. THESIS

LINGUISTIC COMPETENCE OF CHILDREN AND ITS RELATIONSHIP WITH THE MOTHER-TONGUE OF THE STUDENTS

This work compares the linguistic competence of native and non-native students residing in a contact area. It is a longitudinal study which aims to measure the language development of both group, and existence of Interlanguage continuum. The study also investigates weather there exist any significant difference between the group in the acquisition of ten linguistic areas.
