SKILLS

React.js	Node.js
PostgreSQL	JavaScript
Express.js	CSS
Elastic Search	Redux
Postman	Ajax
Webpack	JSON
REST APIs	GitHub
Git	Jira
MongoDB	Debugging
Material UI	

EDUCATION

Master of Engineering - CSE
Sathyam College of Engineering and Technology
11/2020 - 04/2022

Bachelor of Engineering - CSE
Bethlehem Institute of Engineering
08/2014 - 04/2018

LANGUAGES

English · Tamil · Malayalam

SUMMARY

Full-stack developer with 4 years of experience building performant, user-focused web applications using React.js, Node.js, and PostgreSQL. Skilled in Elasticsearch/OpenSearch, Material UI, REST APIs, and Redux, with a solid grounding in backend development and database management. Known for strong problem-solving instincts, a focus on performance optimization, and a track record of shipping efficient, reliable solutions.

PROFESSIONAL EXPERIENCE

- Software Engineer**
Wellspring Systems
- 10/2021 - 11/2025
- Developed and maintained full-stack web applications using React.js, Node.js, Express, PostgreSQL, and MongoDB.
 - Built dynamic, responsive UI components with React.js and Material UI to deliver a smooth, consistent user experience.
 - Worked within Agile/Scrum ceremonies, adapting quickly to shifting priorities across project cycles.
 - Maintained clear, up-to-date code, API, and project documentation to support knowledge sharing across the team.
 - Wrote unit, integration, and end-to-end tests using Jest to safeguard code quality and catch regressions early.
 - Partnered closely with designers, product managers, and QA engineers to ensure seamless, on-time delivery.

PROJECTS

- NDR-LogRhythm**
- 03/2022 - 10/2023
- React · Node.js · PostgreSQL · Elastic Search**
- Built dynamic, responsive UI components with React.js and Material UI, ensuring a smooth user experience.
 - Handled API integration and data visualization using ECharts and Material React Table.
- Cyberblitz**
- 10/2023 - 12/2023
- React · Node.js · Express.js · PostgreSQL**
- Implemented a micro-frontend architecture in React, breaking a large application into modular, independently deployable components to improve scalability and agility.
 - Built and maintained API servers with Express, Sequelize (PostgreSQL), and Axios for smooth, efficient frontend-backend data handling.
 - Integrated a Redux-powered global date range picker enabling seamless data filtering across the application.
